industrial solutions

Technical characteristics of biogas plants for poultry farms

Characteristics		Parameters	Values						
1	Raw material capacity (inlet)	tons/day	20	40	60	80	100	200	400
2	Biogas production	m ³ /day*	2600	5200	7800	10400	13000	26000	52000
3	Plant electricity consumption	kW	20	40	50	70	90	120	200
4	Plant heat power consumption	kW	80	160	240	320	400	750	1200
5	Maintenance personnel	operator	1	1	1	1	2	2	2
6	Area required	hectares	0,3	0,5	0,7	0,9	1,5	1,8	3,5
7	Solid bio-fertilizer output	tons/day	7	14	21	28	35	70	140
8	Liquid bio-fertilizer output	m ³ /day	10	20	30	40	50	100	200

* - biogas production from fresh chicken dung

Price list for poultry farm biogas plant

Raw material capacity (inlet) tons/day	Price EURO			
	Project documentation	Supervision*	Equipment	Construction**
20	25000	20000	350000	310000
40	40000	20000	520000	480000
60	50000	20000	650000	570000
80	62000	20000	740000	720000
100	70000	20000	890000	820000
200	75000	20000	1700000	1560000
400	80000	20000	3200000	3250000

* - includes contract supervision, starting-up and adjustment, training

** - construction part (concrete tanks) can be executed by the customer under ZORG documentation and supervision at price cost without any surcharges

- price is based on FCA Memmingen (Germany)
